

V-1 PREMIUM NON-SHRINK GROUT NEW PACKAGING

The packaging for Unisorb's V-1 Premium Non-Shrink Grout is getting an upgrade. Customers will begin seeing the new bags in the summer of 2024. While V-1 Premium Non-Shrink Grout will be the same industry leading product that our customers have come to know and love, the bag is getting a new look.

Along with the new graphics, we have opted to use a slightly larger bag that will be more durable under normal use. The bag will retain a multiple layer design and a plastic lining. As always, V-1 should be stored in a climate-controlled environment that is protected from the elements.

Look for shipments of V-1 Premium Non-Shrink Grout presented with our updated logo and new corporate branding to arrive at your facility during the summer of 2024.
