UNISORB GROUT SPOUT

Do you have a jobsite where space is tight and grout placement feels impossible? Machine skirts blocking access? Anchoring points in hard-to-reach corners? Joints around isolated foundations that need sealing?

UNISORB has the tool to solve the problem. The Unisorb Grout Spout helps you deliver grout exactly where you want it, while cutting down on drips, spills, and cleanup.

Keep it clean. Control the stream.

The Grout Spout is designed for placing two-component epoxy grouts, including:

- Standard V-100 Epoxy Grout
- CR Hi-Flow V-100 Epoxy Grout
- Joint Filler V-100 Epoxy Grout
- Any other low viscosity, highly flowable grout products

With a rated capacity of 41 oz. (1.2 L), the Grout Spout gives you a simple, efficient way to handle even the toughest grout applications.

Why use the Unisorb Grout Spout?

- Direct grout placement into tight or obstructed spaces
- Minimize wasted material from spills and drips
- Improve precision and control of grout flow
- Reduce cleanup time and jobsite mess
- Compatible with all UNISORB epoxy grouts

Keep your jobsite clean. Control the grout stream. Choose the UNISORB Grout Spout.
