

## UNISORB Vector Collar™

Precision anchoring and alignment component

The UNISORB Vector Collar, utilized for 16mm and 20mm diameter Vector Bolts, is an essential component in anchoring systems. Used in precision machinery applications to enhance machine stability and repeatability. These collars are secured using a set screw to prevent movement or loosening over time. The collars maintain the anchor integrity by providing resistance against operational forces and vibrations. They are capable of bearing heavy loads and enduring dynamic forces, making them crucial for industrial applications.

### Vector Collar Dimensions

Model	Product Code	I.D. Ø	O.D. Ø	Height
VC-167040	450106	18mm	70mm	40mm
VC-207040	450107	22mm	70mm	40mm
